Monday Morning Question: What do you think about a multi-use path between Boulder and Lyons? Each path on the east side of 36 for most of it.

CYCLISTS COMMUNITY 4

BIKE PATH PLANNING

FOR CONCEPTUAL PURPOSES ONLY

A feasibility study will examine potential routes from Boulder (US 36) to Lyons (CO 66) to drastically improve safety on what's known to locals as the State's highest mixed auto-cycling route without a separated cycling facility.

- A distinct planned but unfunded separate path along 28th Street (US 36) could connect
- North Broadway Street
- The path would connect to North Broadway (the multi-use path is currently under construction)
- The path would most likely favor the East side of US 36 right-of-way
