Board or Commission: Housing and Human Services Commission

No Comment

Top Three Concerns from Board and Commission Perspective:

#1. Pollution - Unfettered CO2 emissions at high levels for 15 more years

#2. Environmental injustice/disparate impact - unsafe and unhealthy housing for low income persons in the Eastern corridor

#3. \_\_\_\_\_

Suggestions or Conditions that Board and Commission would like to offer:

#1. Allow the plant to operate for 5 more years with concrete, identified reductions in emissions annually and with a guarantee that it will be dismantled at the end of the term (not just decommissioned). This will address both of the concerns noted above.

#2. \_\_\_\_\_

#3. \_\_\_\_\_
