**Subject:** Cemex

I am a Lyons resident at 206 Cobblestone Ct. Extending the life of an outdated polluting cement factory is bad enough but now importing materials by truck with all of the additional climate gas emissions this will add makes the whole plan nearly insensible given what we know we must do as citizens and decision makers facing the climate crises before us. And this is not considering the Added noise and traffic for another 15 years.

I trust the Town of Lyons will work within its power to try to produce as good an outcome as possible given the circumstances.

Thank you.

Dan Burke.
