

Exhibit A - Scope of Work

1. Perform detailed pavement conditions survey on approximately 10 centerline miles of streets. Methodology applied shall be in accordance with the procedures outlined in the using the Pavement Condition Index (PCI) survey procedure.
2. Perform a condition assessment of paved streets under Town jurisdiction.
3. Create a database of pavement conditions, including a Pavement Condition Index (PCI) for each street segment on a scale from 100 (excellent) to 0 (very poor) pavement conditions.
4. Summarize the findings of the pavement inspections and analyses.
5. Propose pavement capital improvements projects that target areas in greatest need as identified during the pavement inspections and analyses, including projected costs
