PROJECT INFORMATION

The Town of Lyons is working with a Denver-based consulting firm, Clarion Associates, to complete this project. The Clarion project manager, Darcie White, has assisted close to 40 communities with comprehensive plan updates.

The funding for this project is coming from a matching grant from the Department of Local Affairs, through the Energy and Mineral Impact Assistance Fund.

COMPREHENSIVE PLAN

FREQUENTLY ASKED QUESTIONS

TOWN OF LYONS COMPREHENSIVE PLAN UPDATE

Starting in Summer 2021 and concluding in 2022, the Town of Lyons is updating our Comprehensive Plan. The last comp plan for the Town of Lyons was written in 2010 – A lot has happened in town since then! From the historic 2013 flood to changes in residents, businesses, and more, there have been significant changes in town since 2010, making a comp plan update important.

WHY DOES THIS MATTER TO ME?

Elected officials, Town staff, and board/commission members use the priorities outlined in the comprehensive plan to guide the creation or amendment of regulations as well as their everyday decision making. These decisions impact the experiences of Lyons residents and visitors alike. For that reason, making sure that this plan aligns with the wants and needs of the community through periodic updates is essential.

HOW LONG WILL THIS TAKE?

The Comprehensive Plan update process will conclude in the second half of 2022.

Throughout that process, there will be multiple opportunities for community members to provide input – You are encouraged to participate! This could be a relatively small commitment, such as filling out a survey, or it could be more involved, like engaging in a public meeting to give feedback.

WHAT IS A COMPREHENSIVE PLAN?

A comprehensive plan is a document that outlines the long-term vision, aspirations, and goals for a town or city based on input from community members. These plans look ten or more years into the future to help ensure a better quality of life for current and future residents and visitors.

Comprehensive plans address topics like housing, sustainability, economic development, parks/open space, history/culture, infrastructure, and more.
